---

## SUMMARY

---

Cybersecurity Analyst, Web Developer, and Operations Professional with experience in secure web application development, field operations, technical troubleshooting, inventory management, and IT support. Skilled in React.js, Flask, RESTful API integration, Windows/Linux administration, vulnerability assessment, and operational coordination. Experienced in managing company assets, field deployments, reporting, and cross-functional collaboration while maintaining strong expertise in cybersecurity and software development. Passionate about building secure applications, solving technical challenges, and supporting business operations in fast-paced environments.

## TECHNICAL SKILLS

---

**Frontend:** HTML5, CSS3, JavaScript (ES6+), React.js, TailwindCSS

**Backend:** Flask (Python)

**APIs:** RESTful API Integration (VirusTotal, GreyNoise)

**State Management:** React Hooks, Context API

**Cybersecurity:** Threat Analysis & Incident Response, Vulnerability Assessment, Networking Fundamentals, Security Fundamentals

**Operations:** Inventory Management, Asset Tracking, Field Operations, Operational Reporting, Stakeholder Coordination

**Business Operations:** Process Compliance, Documentation, Operational Auditing

**Programming:** Python, Java

**Database:** MongoDB, PostgreSQL, MySQL

**Tools & Platforms:** Git, GitHub, Linux CLI, Windows OS, Remote Desktop, PostgreSQL, MySQL, Nmap, Nessus Essentials, Wireshark, MXToolbox

**Concepts:** Responsive Design, Cross-Browser Compatibility, Component-Based Architecture, Performance Optimization, Agile Development, Network Configuration, Network Monitoring

## EDUCATION

---

**Bachelor of Computer Applications (BCA)**

May 2023 - May 2026

Nitte Institute of Professional Education

Specialization in Cybersecurity

CGPA: 8.94/10

**Pre-University Course (PUC) - Science**

2021 - 2023

Rotary PU College, Moodbidri

Percentage: 95%

## EXPERIENCE

---

**Inter-State Field Officer (IFO) – Instawork**

Jun 2026 - Present

- Conduct interstate field operations and travel across multiple cities to support business requirements.
- Collect, verify, and securely transport recording data and company devices between locations.
- Perform inventory audits, device inspections, and operational readiness checks.
- Coordinate with Data Captains and city teams to ensure smooth execution of field operations.
- Resolve on-ground operational challenges and provide real-time support during deployments.

- Maintain accountability and safe handling of company assets, inventory, and operational data.
- Prepare operational reports and ensure proper handover and takeover procedures for equipment and data.

### Frontend Developer Intern at TEN

Nov 2025 - Jan 2026

- Developed responsive and user-friendly web interfaces using React.js and TailwindCSS.
- Built a personal portfolio website with modern UI and component-based architecture.
- Collaborated in a team to design and develop a Gym Management web application using reusable components.
- Implemented state management using React Hooks and Context API.
- Ensured cross-browser compatibility, responsive design, and performance optimization.
- Followed Agile development practices with collaborative workflows.
- Performed debugging and testing to improve application reliability.

### Cyber Security Intern at Elevate Labs

May 2025 - June 2025

- Developed a Flask-based web application integrating RESTful APIs (VirusTotal, GreyNoise) for real-time IP threat analysis.
- Implemented secure backend logic and handled asynchronous API data processing.
- Performed vulnerability assessments using Nmap, Nessus Essentials, and MXToolbox.
- Conducted network monitoring and traffic analysis using Wireshark.
- Recognized as the "Best Performer" for outstanding performance.

## PROJECTS

---

### Real-Time SOC Simulation Dashboard

Mar 2026 - Apr 2026

Engineered a full-stack SOC simulation platform to detect brute force, port scanning, and malware activity with real-time alert streaming, built using **React**, **Flask**, **MongoDB**, and **WebSockets** for live event visualization and alerting.

### Cyber Threat Intelligence Dashboard

May 2025 - Jun 2025

Designed a threat intelligence platform for real-time IP analysis and threat enrichment, integrating **Flask**, **MongoDB**, and APIs like **VirusTotal** and **GreyNoise** for actionable insights.

### Personal Firewall

Apr 2025

Implemented a desktop firewall for packet monitoring and rule-based traffic filtering, utilizing **Python**, **Scapy**, and **Tkinter** for real-time packet analysis and visualization.

### Gym Management Website

Dec 2025 - Jan 2026

Developed a responsive web application to manage user interactions and gym activities, built using **React.js** with reusable components and optimized UI/UX.

### Personal Portfolio Website

Nov 2025

Built a modern developer portfolio showcasing projects and skills, designed using **React**, **Vite**, and **TailwindCSS** with animations and performance optimization.

### Credential Harvesting Simulation

Jul 2025

Conducted a controlled ethical hacking simulation to demonstrate phishing and credential capture techniques, using **Kali Linux** and **SET Toolkit** to replicate real-world scenarios.

## CERTIFICATIONS

---

- PostgreSQL: Become an SQL Developer – Simplilearn May 2026
- Connecting to MongoDB in Python – MongoDB Feb 2026
- Relational to Document Model – MongoDB Feb 2026
